

Y FRAME CEILING SUSPENDED GOALS

IP1345BF Backward Fold, Rear Braced

The perfect design for gyms where there is significant unobstructed space behind the desired backboard position. No bracing, cables or other structural members are in front of the backboard at any height to negatively impact play.

IP1345SF Side Fold, Side Braced

A good choice when there are concerns about avoiding interference with volleyball courts but the backboard position is too close to the wall for backward folding structures or if ceiling heights are below ideal levels.

IP1345FRBF Forward Roll, Backward Fold, Rear Braced

Unique design allows the upper portion of the Y Frame to roll forward toward the court so that the backboard can fold backward to the ceiling. Ideal when space behind backboard location is limited.
