

ELECTRONIC CONTROLS

BA985KS KEY SWITCH

A standard BA975KS Key Switch is provided for all divider curtain, fold up wall mount and ceiling mount basketball structure, and batting cage orders unless another IPI by Bison control system is specified. Each switch comes standard with up-down labeled single gang cover plate. Multi-gang cover plates are available upon request. **Call for details.**

IPGCS (FORMERLY GCS) GYM COMMAND SYSTEM

Control your gymnasium with the touch of a button. A programmable menu driven touch pad system allows you to control multiple combinations of your basketball backstops, gym divider curtains, multi-purpose practice cages and your electric height attachments. There is a wall mounted legend plate included to allow the operator to identify the equipment number for each operation. The system is menu driven. **Call for details.**

IPGTS GOALTENDER SYSTEM

Wireless control of your gymnasium that controls your basketball backstops, gym divider curtains and multi-purpose practice cage without key switches. Controls your electric height attachments without any key switches or hand held wands. Eliminate the cost of wiring key switches or relay boxes. The system is operated with a hand held keypad digital transmitter. Each piece of gymnasium equipment includes a programmable receiver which operates with a three-digit security code. Each receiver stores up to (8) different codes for up to (8) different multiple applications. All programming can easily be changed. **Call for details.**
