

GYM PROTECTIVE PADDING

IPI can provide a wide range of gym protective padding and outdoor stadium padding to match virtually any specifications. Indoor or outdoor padding is available in 18 solid vinyl colors, photo-quality digitally printed graphic design or one- or two-color lettered vinyl. Common panel sizes include 2' x 6', 2' x 7' and 2' x 8' but can be custom built any size or shape in a wide range of wall and fence mounting styles. Columns, stages, doors, cutouts and virtually any obstruction can all be covered for player protection. Choose from a variety of fire retardant, fireproof, mildew resistant, UV resistant and foam density and thickness options. Call for details.

Indoor Graphic Wall Padding

Let our graphic design staff work with your team to create the perfect custom graphics to enhance your facility and help build team spirit. There is no limit to the range of colors that can be printed with our high tech digital printers. All printed graphics have a thick, clear liquid laminated coating over the printing to create and maintain a sharp clear image. In most cases, the design work done by our art team is free.

Graphic

Indoor Lettered Wall Padding

Start with any one of our 18 solid vinyl colors and add one- or two-color lettering selecting from our available lettering inks. Inks are designed to etch the vinyl to improve adhesion and create a bright, long lasting image. Work with our graphic design team to determine a lettering layout that is compatible with the size of padding that you need. We will also help you select the other wall padding specifications appropriate for your facility.

Lettered

Indoor Solid Color Vinyl Padding

Choose any single color or mix multiple panel colors on a single installation. With 17 colors to choose from, you have a wide range of options but solid color padding can also be used in conjunction with graphic or lettered padding to fit your facility needs and budget. Solid color padding is often the choice when there is a large number of cutouts, custom sizes, doors, columns or other obstructions that might make graphic or lettered padding a challenge. As with other padding styles, our staff will help you select the appropriate specifications to meet your facility's needs and local codes.

Solid

Custom Solid

Stadium, Ball Park and Field Sports Padding

Virtually any outdoor surface that could come in contact with players can be padded including walls, fences, dugouts, poles and columns. IPI standard outdoor flat surface wall padding is constructed of 3/4" FDN CCA treated southern yellow pine plywood with 3" anti-microbial urethane foam attached with moisture proof adhesive. Solid color and lettered styles are covered with 30 oz. flame, mildew and UV resistant vinyl. Outdoor graphic printed padding is covered with 14 oz. flame, mildew and UV resistant vinyl with a clear, non-yellowing protective liquid laminate protective coating. Vinyl has multiple moisture weep holes and uses 100% stainless steel assembly staples and fasteners. Select flange style, Z-channel, chain link or other attachment styles appropriate for your project.

Solid Color Vinyl Options (18 options)
